

INSULATED WALLS ■ INSULATED FLOORS

STRENGTH OF STEEL

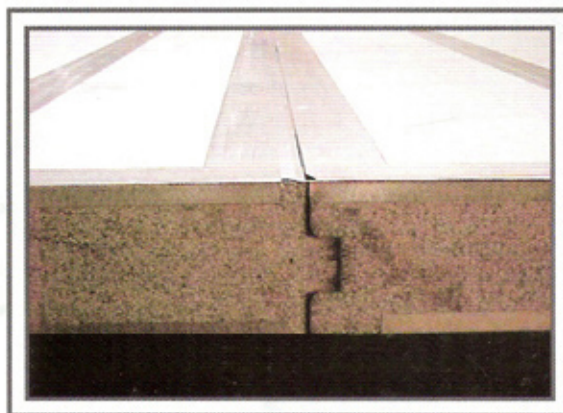

- **ThermaQuik** components support loads up to four floors.
- **ThermaQuik** "H" Panel passes the Southern Florida Hurricane Test.

UNIQUE BUILDER BENEFITS

- **ThermaQuik Building System** cuts framing time by at least 50%.
- Ready-made components include pre-framed door and window rough openings.
- Pre-molded electrical chases are optional.
- Tongue and Groove joints and sheet metal screws allow quick and easy component connection.

SUPERIOR INSULATION

- Energy Star™ compliant pre-insulated steel framing.
- **ThermaQuik** Panels minimize conduction of heat or cold.
- **ThermaQuik** Panels significantly reduce air infiltration.
- **ThermaQuik** Panels improve acoustics and protect against fire, moisture, mildew, decay and termites.

- All **ThermaQuik** Panels can be clad with standard finishing materials.
- Vertical and lateral load-bearing capabilities are exceptional.
- Waste and clean-up costs are minimal.
- Super quick learning curve.
